Overview

coreBACCO sits at the heart of your operations and provides all of the functions you need to operate your tobacco business. With coreBACCO, retailers can manage their retail store with powerful inventory control features and an easy-to-use retail point of sale system. Manufacturers can use coreBACCO to manage their manufacturing, inventory, and track customers and orders. Distributors can track sales to retailers as well as their inventory. coreBACCO is built to handle multiple locations.

Even if you don't have a physical store, you can still use coreBACCO for order entry and your salespeople. coreBACCO is a great fit for manufacturers and distributors, with full order entry and invoicing, special orders, assemblies and kits, online payment portal, and much more.

More Than Just Sales

Sales

Optionally scan a drivers license, add a customer, or quickly ring sales. Sales can be easily suspended until the form is filled. coreBACCO supports waiting periods if your state requires them.

Special Orders

Ring up special orders for items that aren't in stock and check your distributor's inventory. Minimum deposits can be required on a special order, as well as receive open order alerts.

Exchanges

Customers can easily exchange one item for another within one transaction. Quickly swap out an item; even if it's not an even exchange, coreBACCO will figure that out.

Returns and Refunds

You can easily process partial returns or full refunds by scanning the customer's receipt or searching for the previous sale. You can also ring up a new return.

Store Accounts

When making a return instead of refunding the payment, you can also offer your customer credit on their store account. They can then use this credit for a future transaction.
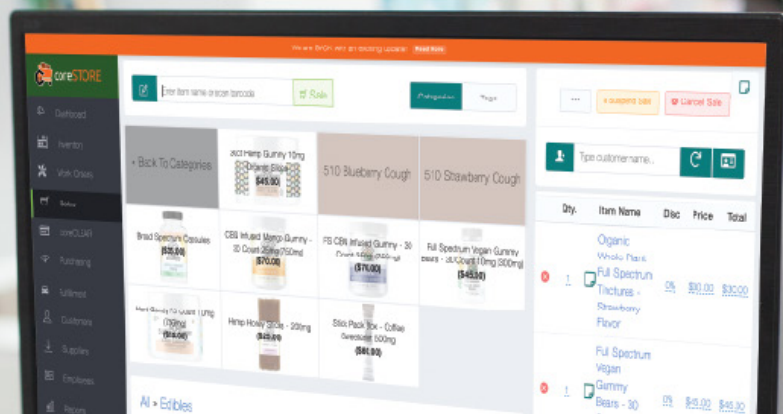

Invoicing

You can easily create an invoice from a sale and email or print the invoice. Customers can log into your online payment portal to view their open invoices and make payments on them.

Estimates/Quotes

Set up estimates and quotes for customers, and either email or print them. When the customer is ready to buy, pull up their quote and convert it into a sale, layaway, or special order.

Work Orders

The work order is a comprehensive and fully integrated module that is included in coreBACCO. You can print, track the status, and easily assign work orders.

Inventory Management

Inventory Management

Do whole or partial inventory counts and stay up-to-date with email inventory alerts and warnings.

Purchase Orders

Create automatic purchase orders based on reorder and replenish levels. Automatically email this to your supplier.

Transfer Stock

Easily transfer inventory between locations via our receivings module. This makes transfers a breeze.

Categories

Setup an unlimited number of product categories and subcategories. Assign your products to categories and see your selling trends for each category by printing sales reports.

Serial Numbers

You can now manage items with serial numbers and assign different prices depending on the serial number.

Buyer Assistant

Our buyer assistant will help you better manage your inventory. Buy what you need when you need it, review recommendations, and only end up with inventory you need.

Easy Inventory Counts

Do whole/partial inventory counts and stay up to date with email inventory alerts and warnings. Use mobile devices to count your inventory. Multiple employees can count inventory at the same time.

Item Attributes and Variations

Item attributes help you keep track of color, size variations, and more in your products for inventory and sales. To create an item attribute is a two step process.

Item Kits

Bundle items together when you have one or more that you want sold together for one list price. Item kits allow you to still keep track of your individual inventory.

Assembly Items

Track your build process. coreBACCO will alert you if you don't have enough raw materials. Assembly can include non-stock items, like labor, to properly calculate cost.

Cost Price Averaging

Cost price averaging is a powerful feature to have an accurate representation of profit and to properly report your inventory costs and cost of goods sold.

Barcode Printing

Easily print pricing labels or shelf labels. Our barcode labels can be completely customized and you can have an unlimited number of barcode label templates.

Business Operations

Cash Management

Easily track cash that is in the register and manage additions and removals from the register. Reporting is also available to easily track shortages and overages.

Reports

Get comprehensive insights into your business with 40+ detailed reports designed for you.

Fast Employee On-Boarding

Unlimited training makes employee on-boarding fast and simple.

Multiple Locations

Designed so you can easily add store locations as your business requirements change.

Commission

Track employee commissions easily, down to the item level. Very flexible on how commissions can be applied.

Tier Pricing

Set different price levels for your items. An example would be a wholesale tier. You can assign a customer to a tier so you can ensure they always get the right price!

Email Receipts

You can easily set up coreBACCO to send receipts, invoices, and purchase orders to customers and suppliers via email.

Employee Time Clock

Easily track your employees' time on the job with an integrated time clock feature.

Internal Messaging

Send messages and announcements to all of your employees and they will see them when they log in.

Item Variations

Create different sizes, colors, or any attributes you define for your items. You can track inventory down to the variation and even have different prices per variation.

Cross Platform Mobile Compatibility

You can use our Mobile App on Android or iOS.

Business Operations

Custom Views

Choose the fields you want to display for items, kits, customers, suppliers, and employees.

Custom Fields

Add custom fields to the sales screen, work orders, customers, inventory, bound book, employees, and more.

Import and Export Capabilities

With our import tool, you can set up customers, items, suppliers, and gift cards. With our export tool, you can export what you want, when you want it. With coreBACCO, your data is yours.

Customer Facing Display

Use a second monitor or tablet to have a customer see the sale as it happens! This allows your customers to make sure the sale is correct.

API

We have an API for custom development with coreBACCO. This allows for extensive customizations and work flows.

Split Payments

Accept multiple payment forms in cash, credit, debit, or customer payment types during a sale.

Payment Options

In addition to integrated credit card, EBT/EBT processing, cash, check, and gift cards, you can define your custom payment methods.

Custom Receipts

We offer a variety of different configuration options for making your receipts how you want them.

Bank-Level Security

coreBACCO implements stringent security measures to protect your customers and your business.

Gift Cards

Sell and redeem gift cards in our system. You can print gift cards from our partner Plastic Printers or use a company of your choosing.

Coupons and Promotions

Create coupons for specific deals or other promotions and print them on customer receipts. "Buy One, Get One" or "Spend $100 get 50% Off" for example.

Customer Loyalty Programs

Create loyalty programs to keep your customers coming back. Choose between two different types of loyalty programs to offer your customers.

Retail Store Integrations

coreFORCE

An enterprise eCommerce platform with content management, CRM, customer service, blogging, and so much more.

coreILLA

A powerful Customer Relationship Management platform that allows you to tailor your customer's experience even further.

EasyPost

Easily print shipping labels for online orders or orders taken at the store that need to be shipped out. Rate shops for the best pricing.

Checkeeper

Print checks for consignments or to pay your vendors with ease. You can print checks on your printer, or let Checkeeper print and mail your checks.

Twilio

Send receipts via text. Or, send a message to your customers by signing up to Twilio, the leading SMS platform. If you use the work order module, you can inform customers of their repair status.

Shogo.IO

Seamless integration into Quickbooks Desktop and Quickbooks Online. For a low monthly fee, keep your accounting system up to date.

Mailchimp

Mailchimp is an email list service that allows you to send messages to your customers in an easy to use interface.

coreCLEAR Smart Terminals

The coreCLEAR family of smart terminals distinguish themselves from other "dumb" hardware through interactive engagement features.

CLEAR 8500
Rethink & Reimagine Retail

The idea behind the CLEAR 8500 is simple. Looking beyond product features to redefine the purchase experience. Every detail of CLEAR 8500 was thoughtfully considered and meticulously designed; like every detail of your brand experience and customer journey.

CLEAR 6200
Powerful & Versatile Mobile Payments

The CLEAR 6200 is a secure, smartphone sized, advanced mobile payment solution. Perfect proportions, ergonomic design, and unmatched response times ensure a comfortable and consistent customer experience wherever payments happen.
